**Subject:** RE: Tank Emission Estimate / Request For Information

**Categories:** For FOIA response

Dylan,

An extra week is reasonable, considering the factors you mentioned below. I look forward to receiving Savoy's response to the request for information, submitted by January 23, 2015.

Thanks,

Natalie

**Subject:** Tank Emission Estimate / Request For Information  
**Importance:** High

Dear Natalie,

Regarding the Request For Information requiring a re-calculation of the estimated VOC emissions from tank batteries at our south east Michigan facilities – it will be difficult to meet the January 16 deadline. We have hired a consulting firm to build the model using the API E&P TANKS software; the set-up of this model is complete. We took pressurized oil samples on December 30. These samples had to be shipped to a lab in Texas. I spoke with the lab today and they had not yet completed the analysis.

Because it has taken longer than expected to get the needed oil analysis done, will you please extend the deadline to submit tank emissions estimate to January 23, 2015? This additional week will allow the lab to finish oil analysis, then the consultant can enter data into mentioned computer model and prepare estimate for submittal.

Regards,

Dylan Foglesong
